"OVERVIEW OF FORENSIC ODONTOLOGY"

This webinar provides an engaging overview of forensic odontology and its vital role in legal and humanitarian investigations. It covers human identification, bite mark analysis, and age estimation, with a focus on challenging scenarios like mass disasters. The session also explores emerging tools such as digital imaging, DNA analysis, and AI, while underscoring the need for education, standardization, and collaboration.

02:00 – 04:00pm IST

31 May, 2025
